

Electrical Distribution Designer

Lectel is an expanding consulting engineering firm specialising in design and project management of electrical reticulation, distribution and lighting design, together with telecommunications design throughout Qld and NSW.

Lectel is accredited by Essential Energy, Energex and Ergon Energy to undertake design services. We are also on both the NBN & Telstra National Panel of design contractors. We have carried out hundreds of projects for these clients over the past 15 years and have won multiple awards in this time. We also hold ISO9001 QA accreditation.

We are seeking an experienced Electrical Distribution Designer to join our dynamic team and will enable the successful applicant to work from home. This position also offers the opportunity for advancement to design manager in the future.

To secure an interview you will ideally have the following skills and attributes:

- Significant experience in Electrical Distribution Design
- Eye for quality
- Ability to liaise effectively with clients and staff
- Excellent communication skills
- Advanced Diploma in Electrical Engineering or Cert 4 in Mains Design or equivalent or similar trade based experience
- CAD, MS Word and Excel literacy
- Hold a current Drivers Licence
- Must be time and deadline focused

The primary duties of this role are:

- Design of Electrical Distribution Networks, both overhead and underground
- Design of Subdivisional Electrical Reticulation & Road Lighting
- Field inspections
- Liaison with clients, utilities and councils
- Red pen mark ups of plans for drafting
- Managing your own design budgets and timetables
- Reporting to Supervisors

Lectel offers competitive salary packages and flexible work arrangements together with a pleasant office environment and great staff. We are an employer who recognises and rewards the contributions and achievements of staff and have a management team who support the future career aspirations of our employees.
